OWNER/OPERATOR PREVENTIVE MAINTENANCE

Kingdom Pilots Chapter, Missouri Pilots Association

Fulton Airport, Fulton, MO

Thursday, November 7, 2002

7:00 PM – 9:00 PM

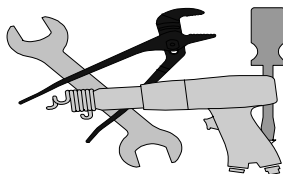

PROGRAM

What certificate privileges do the Federal Aviation Regulations give pilots to work on their own aircraft?

There are 32 specific preventive maintenance items that a pilot may perform on an airplane owned or operated by him/her listed in Appendix A in Part 43. These are called *preventive maintenance items*. An aircraft owner or pilot who is looking for ways to reduce the cost of aircraft ownership or use should know what they are allowed to perform. If you perform preventive maintenance you are required to follow the same rules in Part 43 that a certified mechanic is held to.

This safety seminar is designed to enlighten those people who perform or want to perform preventive maintenance and what responsibilities go along with that privilege.

Participation at this event may be used in the WINGS Pilot Proficiency Program.
